

A culmination of touch,
audio & visual engagement...

Premium 4K touchscreen with
built-in Android & 3 year onsite warranty

Revolutionise the way your business can collaborate, interact, learn & communicate...

Refresh your meeting space, or boardroom with our latest collaboration and presentation device – the CommBox Pulse. No matter whether Instant digital whiteboarding, Collaborative Video Conferencing, browsing web or accessing the 365 suite and documents, The Pulse will improve and enhance teamwork and collaboration in your workspaces.

A Smarter Stylus

The CommBox smart stylus interfaces directly with Office 365.

Draw, write or highlight text with digital ink, advance through slides and navigate your way through spreadsheets remotely.

The CommBox Pulse V3 Active Stylus heightens the overall user experience. With effortless wireless charging, it is always ready when you need it. Featuring pressure sensitivity, an eraser and palm rejection, it could not be easier to start annotating. Point at images and text from anywhere in the room using the virtual laser function, or advance/backtrack through presentations with the next and previous smart buttons.

Transforming learning & working environments everywhere....

The CommBox Pulse V3 **replaces your whiteboards, flipcharts and dated projectors**. Utilise **in-built whiteboarding**, **web browsing** and **file management** to save, re-use and share valuable content your team creates, all without a PC or laptop connected.

Want to use your own laptop or PC?

No problem, connect your laptop wirelessly and the CommBox Pulse V3 becomes an extension of your personal device. Connect up to 4 devices at one time, including phones and tablets. This makes for an entirely flexible meeting space or boardroom. You can opt to meet traditionally, present from the back of the room, or have all eyes on you and your content, as you control your device from the CommBox remotely.

Elevated Performance

Exceptionally designed from start to finish, the CommBox Pulse V3 will elevate not only the aesthetics of any room it features in, but the functionality and flexibility of the space. Give presentations life with the CommBox Pulse V3, featuring [PCAP Technology](#), beautiful [edge-to-edge glass](#) and exceptionally sharp, bright images in flawless [4K resolution](#). It really is the ideal collaboration, communication and presentation tool.

Complete VC Flexibility

When it comes to video conferencing, the Pulse V3 is [software and hardware agnostic](#). That means you can customise the system to your preference. Choose your video conference software, camera and microphone and the Pulse V3 will seamlessly integrate with them.

Investment in the Future

CommBox Pulse V3 not only provides stunning graphics and video, but also the peace of mind that all rooms are [future proofed](#). Additionally, if you use your Pulse V3 8 hours a day, every day, it will last 12 years.
